

About Us

State-of-the-art solutions tailored to special clients' needs

Efteca is an engineering, procurement, manufacturing, and project management firm specializing in hydraulic, drive and control, power transmission, and automation systems for industrial applications.

The company was established in 2010 in Tehran, Iran, and is fully privately owned.

Memberships

Improved effectiveness through collaboration with communities

Over the years we can claim that have enjoyed effective contribution in developing infrastructure and industrial projects through collaboration with professional communities.

*Iran China Chamber of
Commerce & Industries
(ICCCI)*

*National Association of
Industrial Automation
Companies (AIAC)*

*German-Iranian Chamber of
Industry & Commerce (AHK)*

*Tehran Chamber of
Commerce, Industries, Mines
& Agriculture (TCCIMA)*

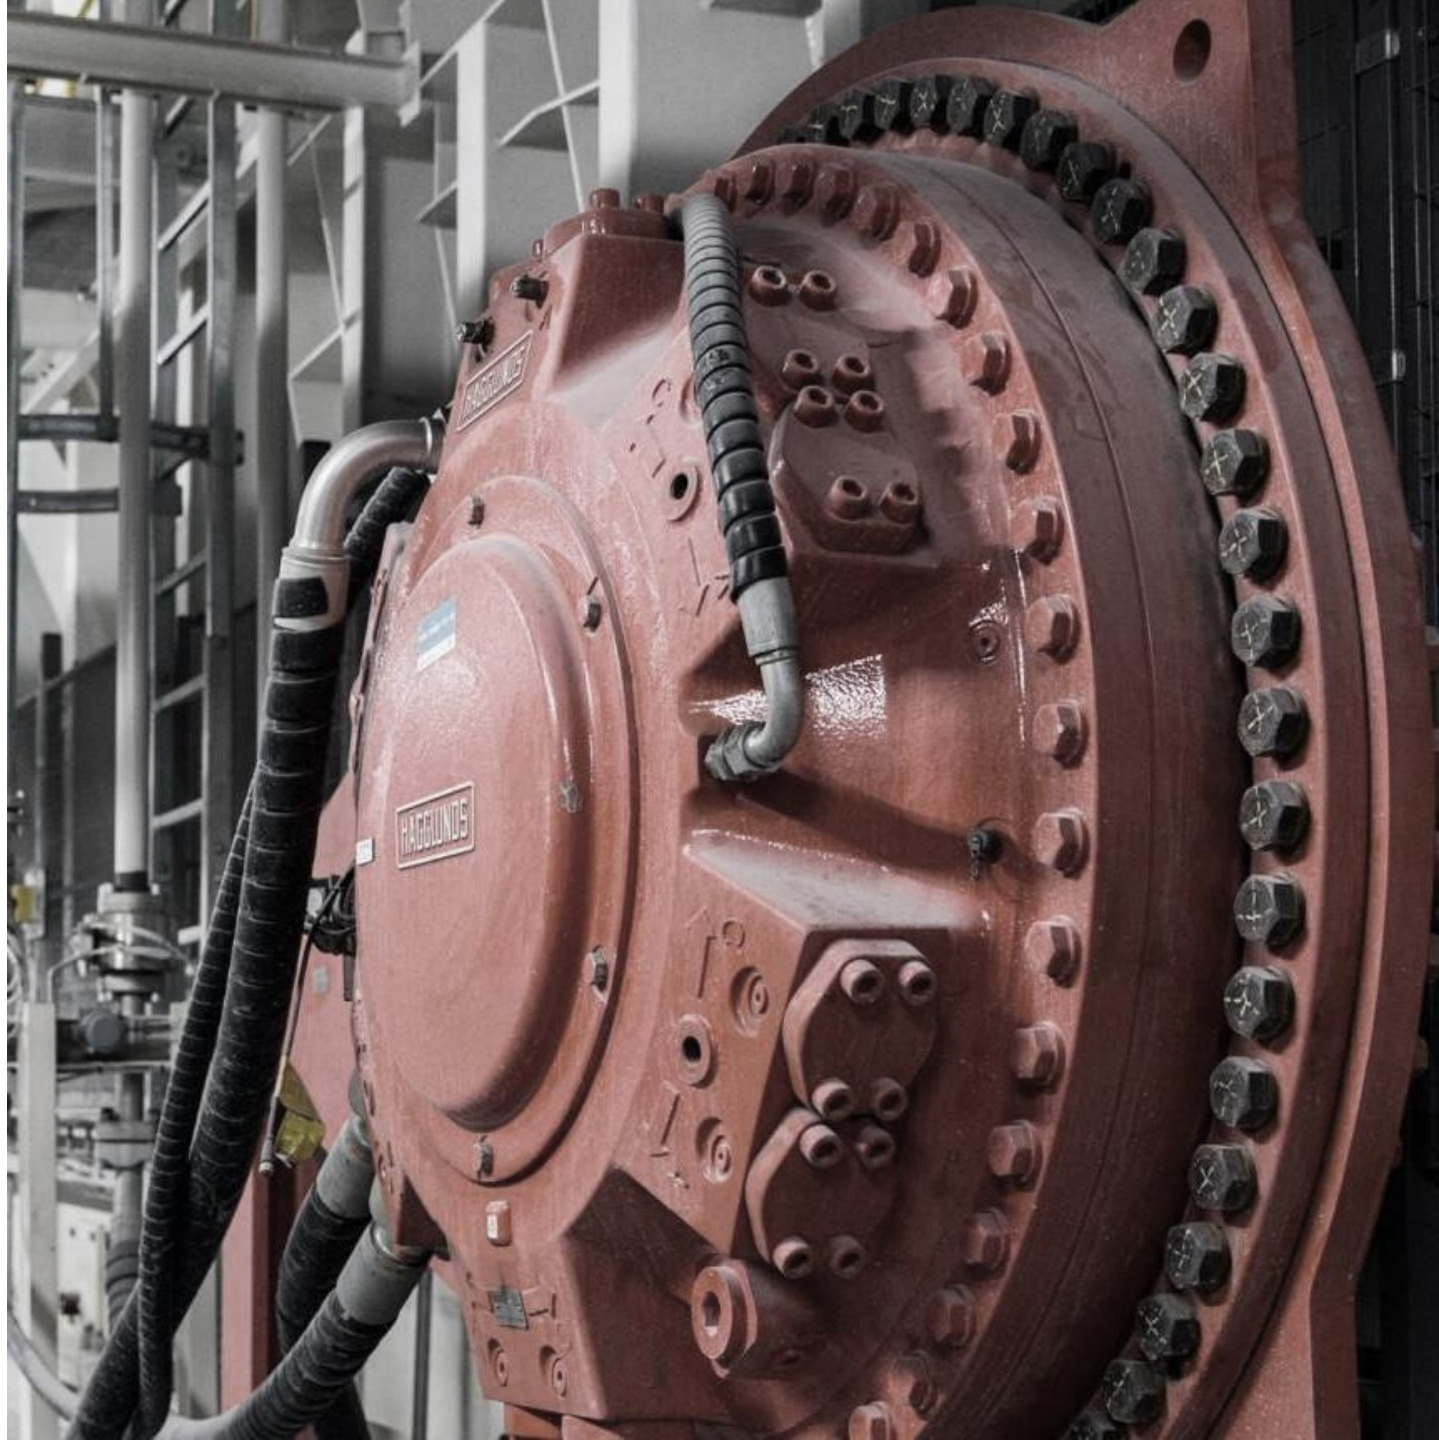

Product Groups

Hydraulic Systems

We provide best-in-class hydraulic components and design complete hydraulic systems for any application.

We provide a complete range of hydraulic motors, pumps, cylinders, power units, control blocks, accumulators, monitoring instruments, filtration and cooling systems for industrial and mobile applications.

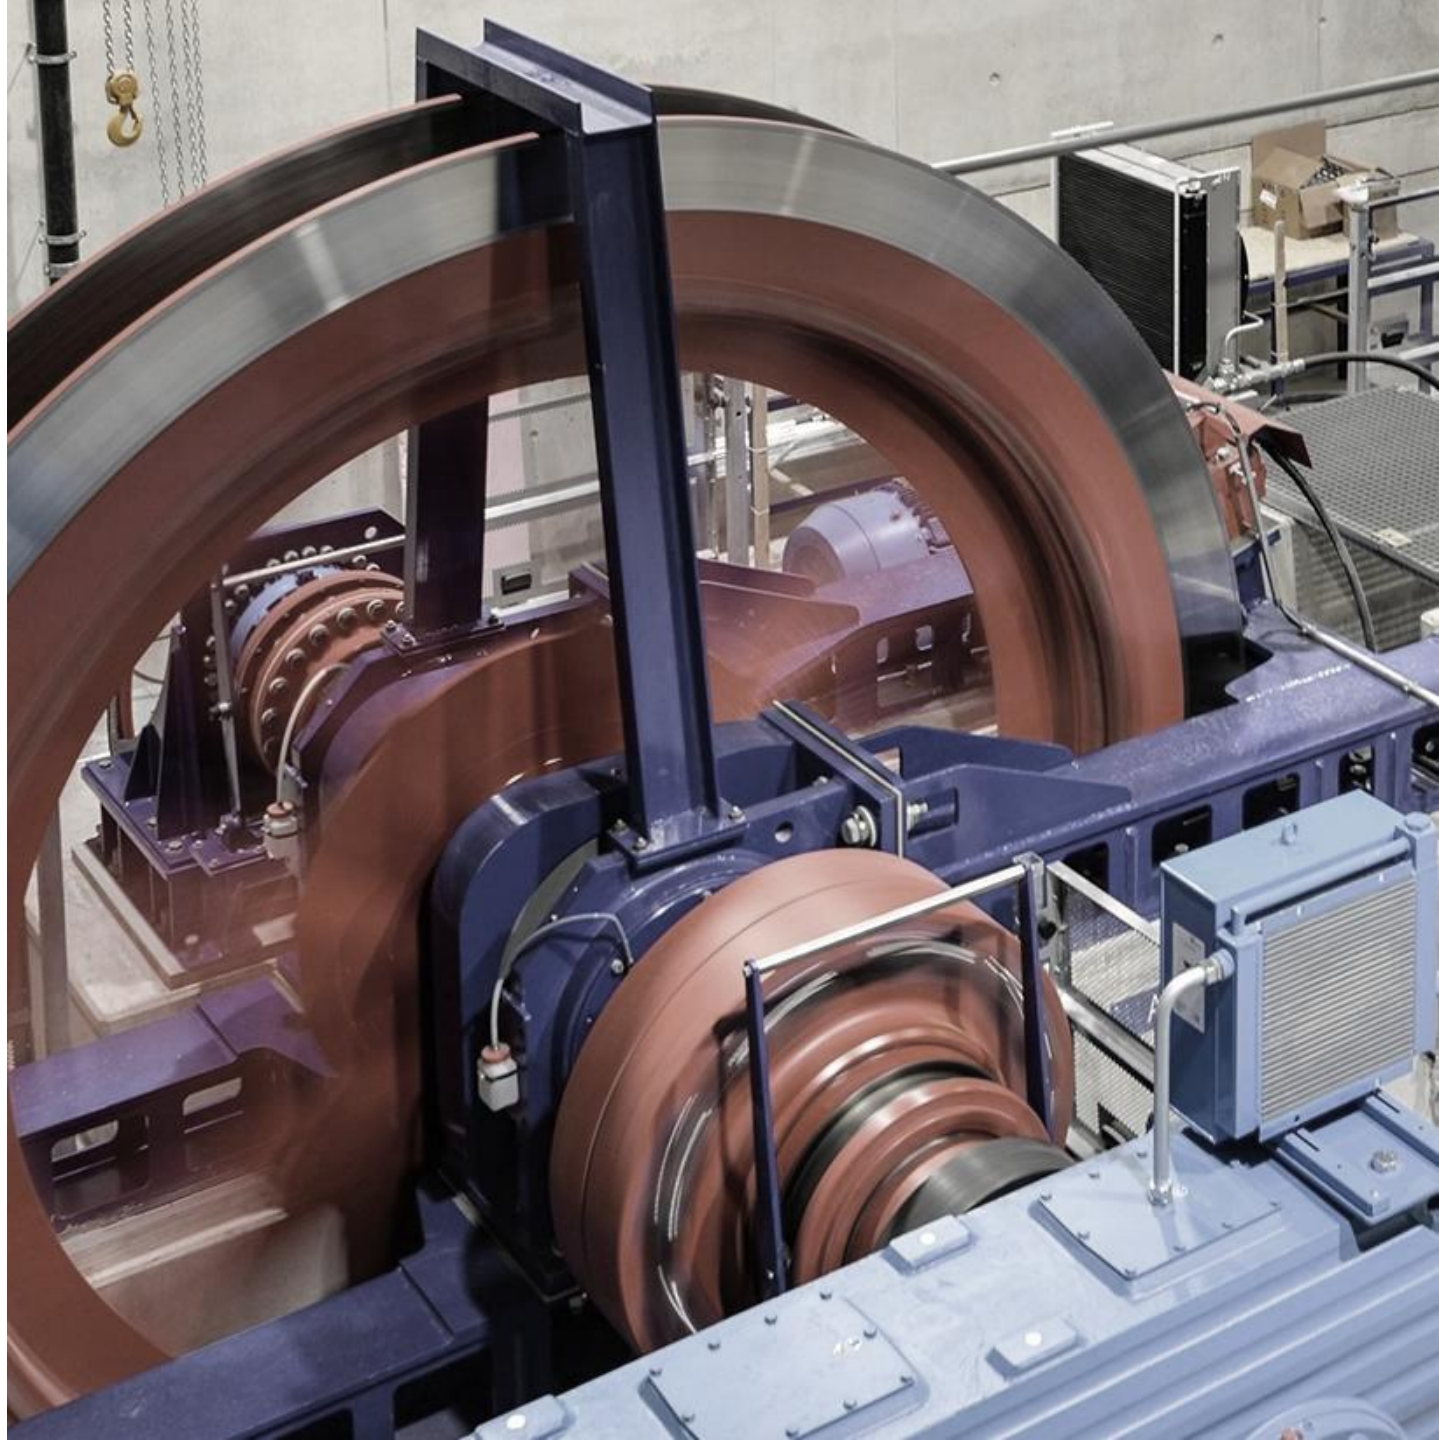

Product Groups

Power Transmission

We provide a complete range of power transmission solutions; manufactured for quality, reliability, and ease of maintenance from around the world for standard and bespoke designed couplings, gearboxes, and brake systems.

Product Groups

Tightening Systems

We provide the tools and systems you need to sustain high volume, high-quality assembly operations.

We offer precise tightening technology – tools, control systems, and the corresponding accessories – for all tightening tasks in a wide variety of industries.

Industries

Serving major industries nationwide as a trusted partner

We have served as a trusted partner to major industries nationwide, delivering precision motion, drive, and control solutions.

Mining & Metals

...

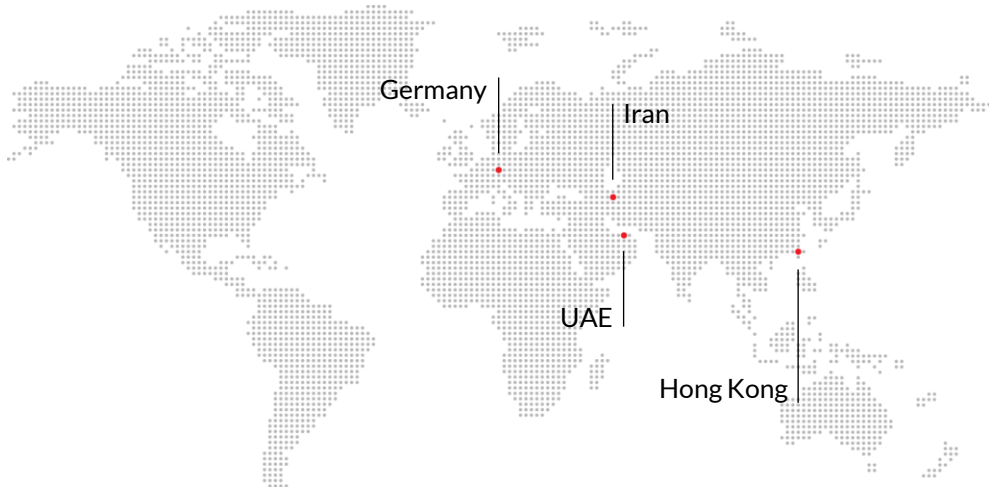

Procurement

Global reach through strategically located offices worldwide

Over the years, we have built a global supply network, establishing domestic offices in Bushehr, Bandar Abbas, and Tabriz, and robust partnerships abroad in Germany, UAE, and Hong Kong to ensure seamless reach and agile supply.

Partners

Future-focused solutions through
collaboration with technology partners

*We are the authorized representative and certified sales
and solution partner of the aforementioned leading
global manufacturers.*

Engineering

In-depth knowledge of fluid power technologies, forged by experience

Our engineering team has extensive experience with electrical controls, hydraulic circuits, servo controls, proportional controls, pneumatic controls and systems, and electromechanical actuators.

Our clients expect solutions that are tailored to their needs. Through our worldwide network, we develop and produce precisely such solutions, always in close proximity to manufacturers and their specific challenges.

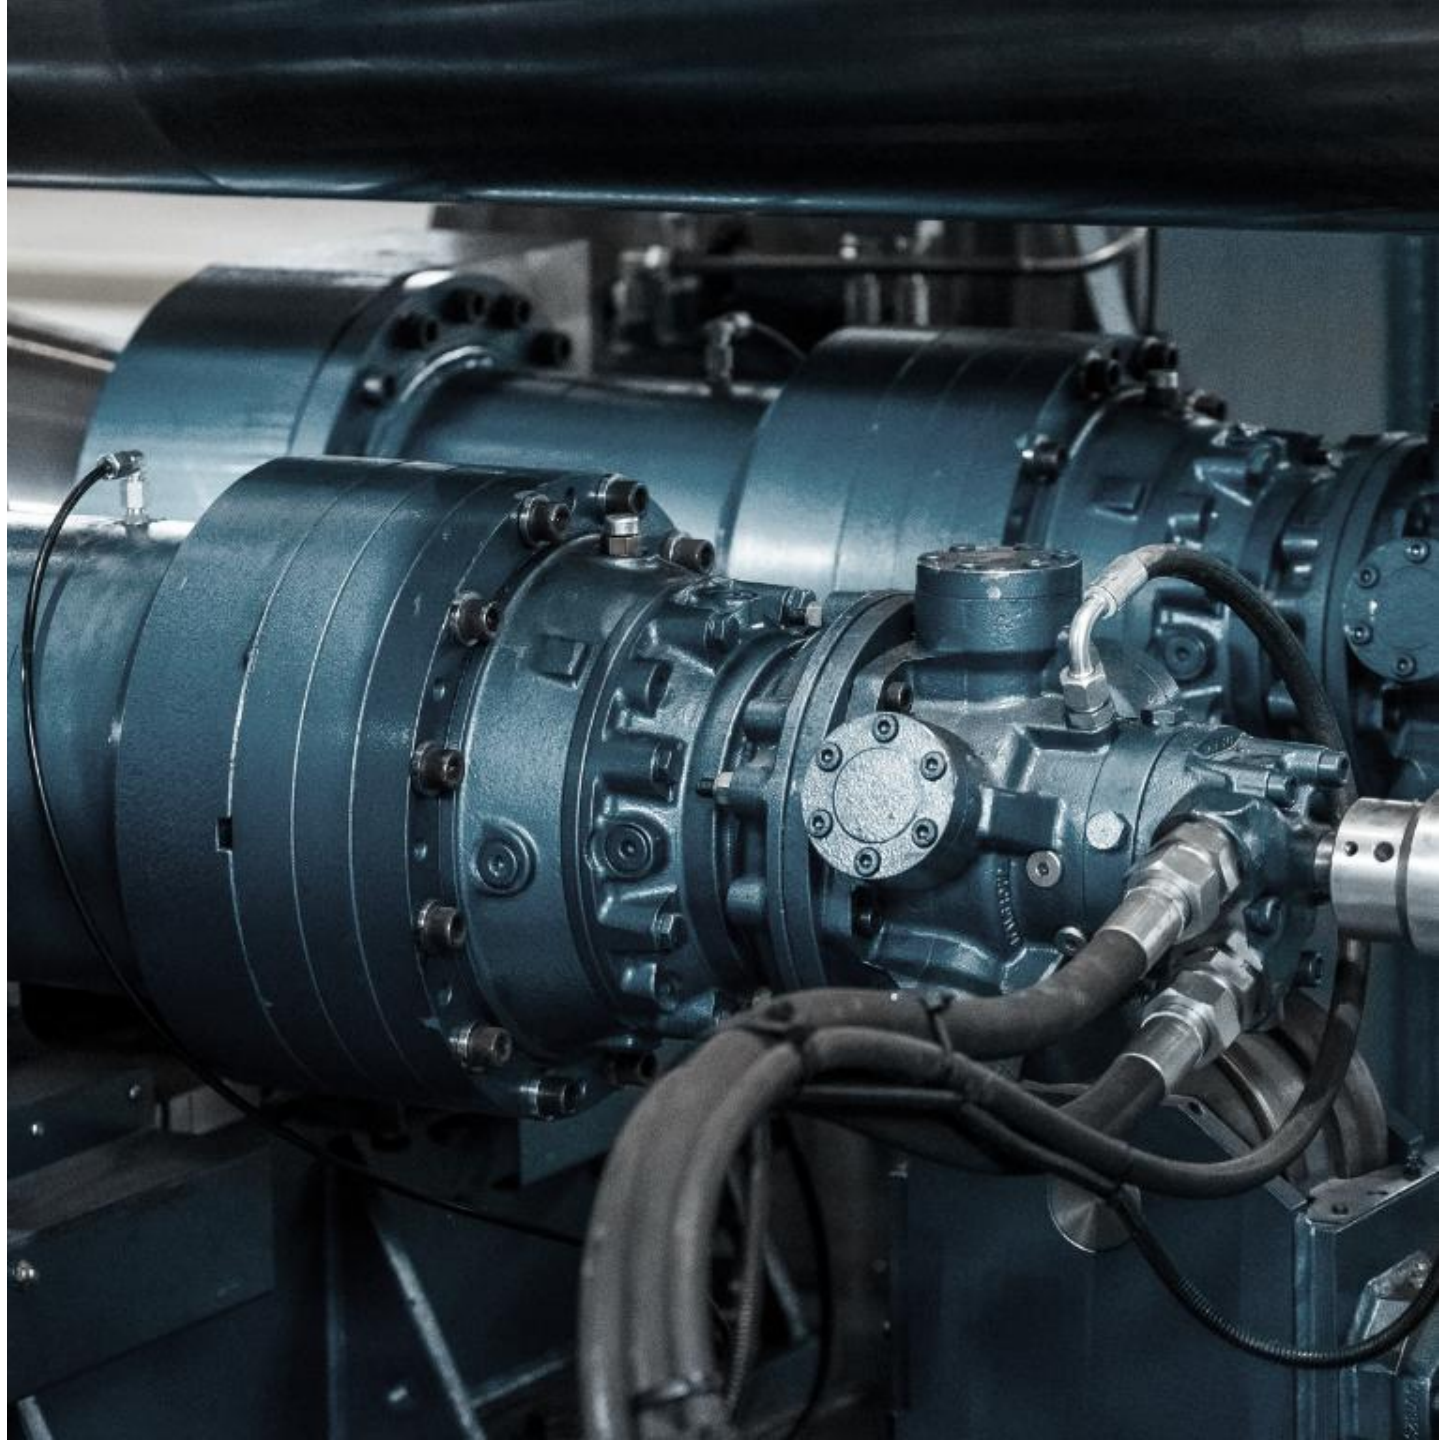

System Integration

Managing the entire project from concept to commissioning

Understanding the client-specific requirements, we involve integrating existing, often disparate systems in a way to meet your needs. More and more systems are designed to connect, both within the system under development and to systems that are already deployed.

We constantly enrich our technical knowledge and employ technological advancements to ensure providing state-of-the-art solutions. Whether by developing a new system from scratch or renovating, upgrading, and integrating existing systems.

Service

Get like-new performance from your hydraulic equipment

We offer service center-based repair, warranty, and maintenance programs, genuine spare parts — the latest technologies, not just what fits! and expert application development supports, drawing on world-class engineering resources.

Certificates

Excellence delivered by relentlessly pursuing improvement.

We are determined to deliver excellence through dedication to continuously improved quality, occupational health and safety, and environmental management systems across all operations.

The integrated management system is certified by OTC Bulgaria, a Bulgarian certification body.
